SESSIONS SUMMARY

"Electronic Communication on School Buses"

*Two-way radios have long been an important tool to ensure proper communication for school buses. Drivers have a way to connect with dispatch and schools to communicate delays, emergencies, arrivals, ETA's and departures. With the growth of communities, industries, traffic and construction, traditional radio systems can sometimes pose challenges in communication with obstructions of tower signals, creating dead spots which could pose safety risks in critical moments. Lori Hays, General Communications, will provide an overview of the technology as well as explain newly developed solutions with two-way radios. **Presented by: Lori Hays and Rick Krasnowski, GenComm***

"Student Management Strategies"

Learn how to defuse challenging and disruptive behavior before an incident escalates to a crisis situation. One of the only providers in Northeast Wisconsin specializing in pediatric psychology, Dr. Tiffany Born looks for ways to support both her young patients and their families, giving them the skills and the confidence to make positive changes together.

Presented by: Dr. Tiffany Born, Pediatric Psychologist, Bellin Health

Dr. Born will present in-person at Appleton location—all others will be virtual

"Clean School Bus Program"

*Updated information on the clean school bus program. Review of the Rebate and Grant programs. **Presented by: Tyler Salamansick, US EPA Region 5***

"Wisconsin CDL Updates"

*Updated information on licensing and testing extensions and regulation waivers. Current statistics of school bus drivers in Wisconsin. Various other CDL updates and information. **Presented by: WI DOT DMV***
